

Tarin Agarwal

Bengaluru, India — +91 9352023583 — tarinagarwal@gmail.com

LinkedIn: linkedin.com/in/tarin-agarwal-810793267 — GitHub: github.com/tarinagarwal — Portfolio: tarinagarwal.in

TECHNICAL SKILLS

AI Engineering: Generative AI, AI Agents, LLM Pipelines, RAG, LangChain, LangGraph, OpenRouter, Pinecone

Backend: Node.js, TypeScript, JavaScript, Python, Express, Fastify, FastAPI, Flask, REST APIs, WebSockets, BullMQ

Databases: MongoDB, MySQL, PostgreSQL, Redis, Prisma ORM

Frontend: ReactJS, NextJS, Vite, TailwindCSS

Blockchain: Solidity, Hardhat, EVM, BSC, Ethereum, IPFS

Game Development: Unreal Engine 5, Unity, ML-Agents, Niagara VFX

Cloud/DevOps: AWS, GCP (Google Cloud Platform), Fly.io, Terraform, Git, GitHub Actions, Docker, CI/CD, Cloudflare

EXPERIENCE

Game AI Intern — Remedy Games

August 2025 – Dec 2025

- Designed 3+ AI behavior systems for NPC decision-making (40% lower response latency via enhanced state machines) and prototyped/fine-tuned 5+ gameplay mechanics across 100+ playtest sessions, boosting player immersion scores by 35%.

Software Developer — Project Hub

August 2025 – Jan 2026

- Architected and deployed 20+ enterprise applications serving 5000+ users at 99.8% uptime with optimized DB queries and API endpoints, achieving 50% faster response times, 10K+ concurrent requests, and 30% faster time-to-market.

Software Developer — Project Mart

Jan 2025 – Nov 2025

- Delivered 54+ production-ready projects with 95% client satisfaction and RESTful APIs processing 100K+ daily requests, resolving 200+ critical bugs/bottlenecks and cutting application load time by 45%.

PROJECTS

LGTM – Live SaaS for AI code review + CI/CD security (#36 Product of the Day on Product Hunt): 6-lens review pipeline merged into 2 structured-output LLM calls (5–10x cheaper, 4x faster), 36 security detectors with 3 enforcement gates and a runtime Watchdog GitHub Action, CycloneDX SBOM generation across 9 ecosystems, Posture Score analytics dashboard, YAML custom-detector DSL, org RBAC, and a CLI; 12-language tree-sitter indexing cut context assembly from 10s to 1s. Node, TypeScript, React, MongoDB, Redis, Fly.io. looksgoodtomeow.in — github.com/tarinagarwal/bugbash

Edulume (Ongoing) – AI-driven EdTech platform with personalized course generation and RAG-based PDF chatbot serving 1K+ learners, powered by a Pinecone vector database with 100K+ embeddings and Redis caching that cut API response time by 70%. React, Node, Express, Prisma, MongoDB, Groq LLM, Redis, FastAPI, Pinecone. edulume.site — github.com/tarinagarwal/edulume

Top Galaxy – Decentralized real-cash gaming ecosystem on Binance Smart Chain with 7 income streams, 15-level referral tree, provably fair commit-reveal digit game (24 rounds/day), and on-chain wallet flows. React, Vite, Node.js, Fastify, BullMQ, MongoDB, Redis, Solidity, Hardhat. topgalaxy.net — github.com/tarinagarwal/Topgalaxy

GhostAudit – Revenue intelligence platform built for the TinyFish Pre-Accelerator Hackathon; uses TinyFish web agents (run-sse streaming) to scrape/monitor pricing pages and surface revenue findings, with a wave-based concurrency model that batches agent runs to stay within API limits and keep findings ordered. React, Vite, Node.js, Fastify, Python, PostgreSQL, Redis, BullMQ, TinyFish API. github.com/tarinagarwal/GhostAudit

Dimensional Dead – First-person survival horror with adaptive AI leveraging PPO reinforcement learning (85% win rate variance across 10K+ scenarios), optimized ONNX runtime hitting 8ms inference, and Niagara VFX rendering 50K+ particles at 60 FPS on mid-tier hardware. Unreal Engine 5.2, C++, ML-Agents (PPO), ONNX, Niagara VFX. github.com/tarinagarwal/Gameathon-Pineapples

EDUCATION

BMS Institute of Technology — B.Tech in Computer Science Engineering (2023 – Present)

Aravali Public School — PCM (2020 – 2022)

ACHIEVEMENTS

- Winner - Gameathon 2K26 TECHNEX 25-26, Buildverse 2025 (National Level Hackathons)
- Runner-Up - GameForge 2025, CodeSprint 2025, Hacksphere 2025, Bugbash 2026 (National/Intercollege Hackathons)
- Top 100 - Hackhazards 2025 (International Hackathon, 8000+ participants)
- 3rd Place - Hackman V8 DSCE, RRC Reva University (24-hour National Level Hackathons)
- Project Admin - Social Winter of Code (SWOC) 2026 for Edulume (Certificate)
